Autoclave

Poleax Series

The autoclaves are constructed with both Microprocessor and Traditional Mechanical designs expect SA-230. They offer advantages such as power conservation, water conservation and reduced maintenance due to less parts. Control panels are designed with simple controls for basic sterilization tasks.

Autoclave

Poleax Series

Features

- EZ Control panel
- EZ maintenance
- Overheat protection
- Pressure overload protection
- Pressure safety valve
- Door safety latch (SA-232X only)
- Pressure auto door lock (SA-232X only)
- Chamber volume: 16 L

Certifications

Sturdy is manufactured in compliance with the following directives and standards:

- 93/42/EEC
- Class IIB (European Directive for Medical Devices)
- 2014/68/EU (Pressure Equipment Directive)
- EN 285 (Large Steam Sterilizers),
- EN 13060 (Small Steam Sterilizers)
- EN 61010-1/-2-040 (Safety Requirements for Electrical Equipment for Measurement
- Control And Laboratory Use – Part 1 and Part 2)
- EN 61326-1 (Electrical Equipment for Measurement
- Control And Laboratory Use – EMC Requirements – Part 1: General Requirements)
- ISO 13485 (Quality Management/Certification)

Autoclave

Poleax Series

Specifications

SPEC/Model NO.	SA-230	SA-232	SA-232X	SA-232V
Chamber Capacity (L)	16			
Chamber Size Diam x Depth (mm)	230 x 410			
Overall Dimensions W x H x D (mm)	335 x 430 x 510		501 x 406 x 537	382 x 614 x 398
Voltage (V)	230	230 / 110		230
Current(A) / Power(W)	7A / 1400W	7A / 1400W (230V) 11A / 1200W (110V)		5.3A / 1200W
Heater (W)	1400	1400 / 1200		1200
Dry Heater (W)	N/A			
Net Weight (Kg)	15.5		30	23.5
Water Fill*	Manual		Tank-Man	Manual
Type	Tabletop			Vertical
Water Tank Capacity (cc)	N/A		4200	N/A
Water Consumption per cycle (cc)	350-400		300-450	

* "Tank-Man" - Contains water tank but still requires knob to be manually turned on/off to fill chamber.
"Manual" - Must add water manually for each session.
